

Simplify Data Management with Confidence

Don't just leverage data—lead with it.

LexisNexis® Risk Solutions help you cleanse, enrich, and connect your data to set the stage for success

Strong data management is instrumental for better service, reduced operational risk and elimination of waste, fraud and abuse. The ever-changing nature of constituent data, its use across disparate systems, and manual processes to update can make data quality management (DQM) challenging for government agencies. LexisNexis® Risk Solutions helps federal, state and local governments harness high quality data elements, powerful linking, machine learning and analytics for better data governance. Manage the ever-growing, ever-evolving expanse of data to find correlations and spot trends.

Key Issues:

Human Error

Transposition of numbers, misspellings, or mistaken omission of key differentiators like “Jr” from a name are difficult to detect and correct.

Duplication

Duplication can occur for a variety of reasons such as system integration, data migration, and errors that can occur during manual data entry. Without a standardized process or mechanism to uniquely identify an underlying entity, traditional rules-based matching systems are not able to detect duplicate records.

Disparate Databases and Systems

Data collected and stored in multiple systems is often fragmented and captured at a snapshot in time, causing inaccuracies.

LexisNexis Risk Solutions is a market leader in the sourcing, maintenance, and delivery of the most comprehensive data for use by government agencies across the country.

Comprehensive Coverage:

Leveraging 10,000 public and proprietary data sources for nearly 100% coverage of the U.S. Adult population

Accuracy:

Proprietary, multi-patented approach to linking using referential data ensures information is linked, and resolved, to the correct individual

Timeliness:

Regular and consistent data refreshes improve quality and reduce latency

Make data management and maintenance simple

In today's fast-moving, ever evolving digital identity climate, accurate and up to date information is critical to effective data management in government agencies. A proactive approach to data quality and management yields efficiencies throughout your agency's workflows and processes.

The prospect of managing the quality and accuracy of your agency's data may sound overwhelming, but it's not. We're here to help.

For over 50 years, LexisNexis Risk Solutions has been a trusted partner to over 9,500 federal, state, and local agencies around the country. Our proprietary linking methodology assigns a unique identifier to individuals with over 99.9% precision and with coverage of nearly 100% of US adults. Managing large volumes of data, resolving data elements to individual identities with precision, and exposing potential risky individual, business, and digital data elements is foundational to what we do as a company.

LexisNexis® Risk Solutions can help your agency with the following:

-  Data Hygiene and Enrichment
-  De-duplication of Population
-  Cross Linking Across Multiple Datasets
-  Data Remediation and Processes
-  Artificial Intelligence (AI) Deployment
-  Data Management Transformation
-  System to System Migration
-  Interoperability and Infrastructure Modernization Initiatives
-  Contact and Locate/Best Phones and Email Addresses
-  Returned Mail/Best Address
-  Referential Identity Linking for Research
-  Updating Personal and Business Data
-  Data and Account Monitoring

We serve all agencies such as:

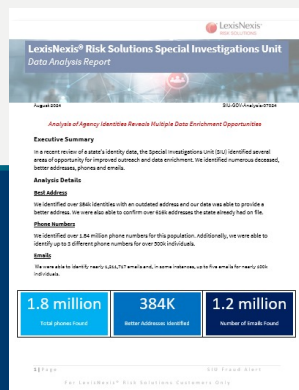

- Public CIOs/IT
- Unemployment Insurance
- State Benefit Programs
- Fiduciary/Departments of Revenue
- State Portal/Digital IDs
- Gaming/Gambling
- SNAP and D-SNAP
- Collections and Payments
- Tax and Regulatory
- Utilities
- Department of Motor Vehicles
- Retirement and Employee Pension Systems
- Data Registries
- Medicaid
- Integrated Eligibility Systems (IES)
- Immunization Agencies (IIS)
- Departments of Health/Public Health
- Workers Compensation/Disability
- Departments of Housing
- Aging & Senior Programs
- Child and Family Services
- Vital Records Offices

Exposing risk

Person Index uses referential linking to assign an agency-specific, person-centric identifier to break down data silos with real-world insights

Proven Information Security Program
designed to protect the security,
confidentiality and integrity of personal
information.

Contact us today for an initial assessment to better understand your population, create transparency and generate trust for your data foundation.

LexisNexis®
RISK SOLUTIONS

Government

Our government solutions assist law enforcement and government agencies with deriving insight from complex data sets, improving operational efficiencies, making timely and informed decisions to enhance investigations, increasing program integrity and discovering and recovering revenue.

LexisNexis Batch Solutions and LexisNexis AmplifyID Master Person Index services are not provided by "consumer reporting agencies," as that term is defined in the Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) ("FCRA"), and do not constitute "consumer reports," as that term is defined in the FCRA. Accordingly, LexisNexis Batch Solutions and LexisNexis AmplifyID Master Person Index services may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment, or another purpose in connection with which a consumer report may be used under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. These products or services aggregate and report data, as provided by the public records and commercially available data sources, and are not the source of the data, nor are they a comprehensive compilation of the data. Before relying on any data, it should be independently verified. LexisNexis and the Knowledge Burst logo are registered trademarks of RELX Inc.
